

FRXSH®

dance the taste

THE FRXSH MOUSSE CHEF CUP SYSTEM

Combinable with existing equipment.
Ready to expand capacity.

FRXSH MOUSSE CHEF

A decision with foresight

When investing in a frozen food processor, the decision is not only on the device, but also on the cups to work with in future. How does the cup system fit with existing cups? How open is it to future needs?

The FRXSH Mousse Chef is designed for both chromesteeel and synthetic cups. With its two protective beaker versions, even chromesteeel and plastic cups from other devices in the same product category can be reused in the Mousse Chef with a perfect fit.

This keeps every option open – for getting started, switching and expanding.

- ✓ Cup system can be flexibly combined and expanded with existing and new cups
- ✓ Simply insert into the matching protective beaker and get started, no resetting needed
- ✓ Uniform sealing cap

The FRXSH cup system for every need

First device:

Build up your stock with either particularly durable chromesteeel cups or – for large demands – with budget-friendly synthetic cups.

Secondary device:

Continue to use existing cups, supplement them with high-quality FRXSH cups at an attractive price and expand the inventory as needed.

Replacement device:

Compatible with existing cups – simply continue to use them seamlessly.
